Compliant E-Invoicing Inside Your SAP

Stay Compliant Without Changing SAP

BE COMPLIANT WITH NO MODIFICATION ON YOUR SAP

Global e-invoicing mandates are growing fast, putting SAP users under pressure to stay compliant without disrupting their systems.

Eaglesoft's SAP E-Compliance Add-On enables full compliance directly within SAP—without custom development or workflow changes.

NO CHANGES TO SAP. FULL COMPLIANCE.

The Eaglesoft SAP Add-On adds compliance capabilities without SAP customization, workflow disruption, or system risk—simply extending your existing system.

A Seamless SAP Extension

Eaglesoft SAP Add-On enables full e-invoicing compliance without changing your SAP core. It automatically accepts any invoice format, converts it to PEPPOL BIS, validates data, applies digital signatures, and delivers via PEPPOL or local networks—all fully automated.

Key Capabilities

Universal support for IDoc, XML, PDF, and custom formats, with automated conversion to PEPPOL BIS, validation, signing, and delivery—directly within SAP.

How It Works

Invoices are created in SAP as usual, automatically processed, converted to Target formats (PINT, BIS3.0, xRechnung, ZUGFeRD, Facturx, FA(3) etc.) and then delivered with real-time tracking.

Benefits

Achieve zero disruption, fast deployment, full compliance, reduced risk, lower costs, and complete automation.

Native SAP Integration

Works seamlessly on SAP without modifying core systems or requiring custom code.

Why It Matters

Non-compliance can result in penalties, rejected invoices, and cash flow issues as mandates approach.
