

DOCNAUT PLATFORM
Powered by Eaglessoft

GLOBAL E-COMPLIANCE PORTAL
E-INVOICING · E-DELIVERY · E-REPORTING

Every e-invoice. Every ERP. Every country.

Docnaut Portal is a global e-compliance platform built around e-invoicing. It connects your ERP or accounting system to Peppol, EDI, email and national platforms, keeps every invoice compliant with the rules of the country it is going to, and covers e-delivery, SAF-T and e-reporting through the same connection.

Peppol Access Point
Official, certified AP and SMP

ISO 27001 · ISO 27701
Certified security and privacy

Any ERP or accounting system
Dynamics, Sage, Odoo and more

ONE PORTAL FOR EVERY CHANNEL

Peppol

EDI

Email

National platforms

Tax authority portals

One global e-compliance platform, with e-invoicing at its core.

E-invoicing mandates differ by country, by network and by format. Docnaut Portal puts them behind one connection: your ERP or accounting system sends its data once, and the portal turns it into the document each recipient and each tax authority expects, for invoices and for the other reporting obligations that follow them.

Works with every ERP and accounting system

ERP systems such as Microsoft Dynamics 365, Oracle, NetSuite, Sage, IFS and Odoo, and accounting software of every size: if it can export invoice data, Docnaut can work with it. Connect by API, SFTP file exchange, database connector or upload in the portal.

Compliant in every country

Each invoice is built and validated against the rules of its destination: EN 16931, Peppol BIS, national formats, and clearance or reporting models. When a mandate changes, the rules are updated for you.

Every transmission channel

Peppol, EDI (EDIFACT, ANSI X12), email with PDF or hybrid invoices, and national platforms and tax authority portals. Docnaut routes each document over the channel its recipient uses.

Official Peppol Access Point

Eaglesoft runs its own certified Peppol Access Point and SMP. Your invoices go straight onto the network, with no third-party provider in between.

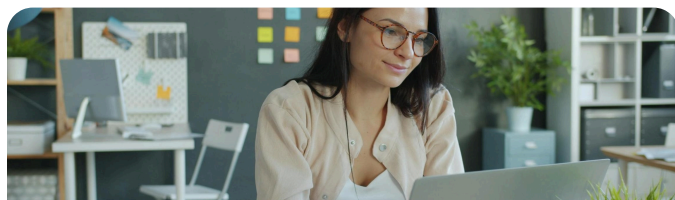

High security by design

ISO/IEC 27001 and ISO/IEC 27701 certified. Signed and encrypted AS4 exchange on Peppol, built-in e-signature and e-seal, full audit logs and e-archive.

Easy for finance teams

Send, receive, search and track every document from one clear screen, with a dashboard of real-time KPIs. Microsoft sign-in and a multilingual interface. No training project needed.

For finance and accounting teams

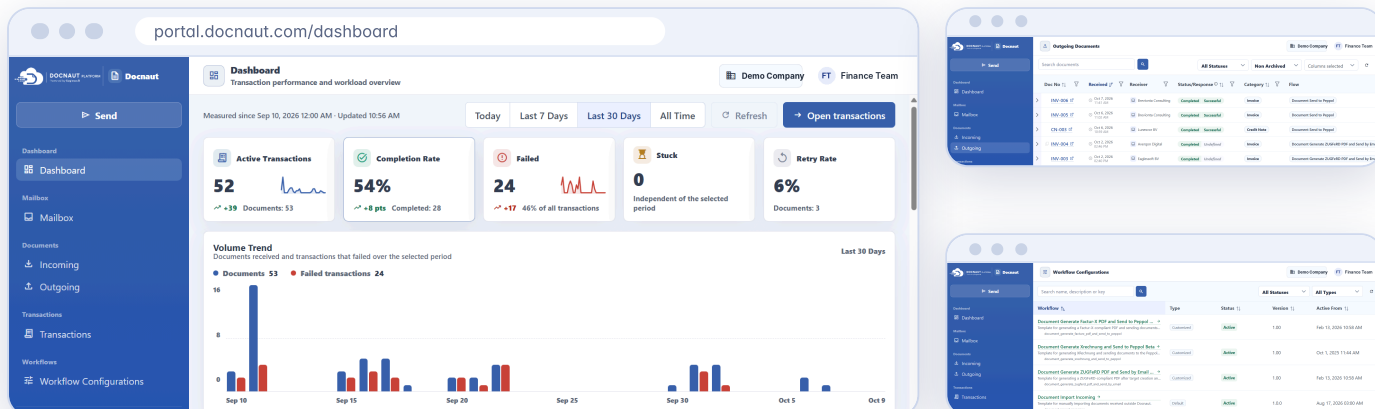

- ✓ Invoices validated before they leave, so VAT and format errors are caught early
- ✓ One provider and one contract for all countries and channels
- ✓ Predictable monthly pricing, with compliance updates included
- ✓ Full traceability of every invoice for audits

For IT and integration teams

- ✓ No changes to your ERP or accounting system: Docnaut works on the data it already produces
- ✓ API-first cloud platform, with file and database connectors where APIs are not an option
- ✓ Cloud service: nothing to install or maintain on your side
- ✓ Real-time monitoring and alerts for every transaction

Daily operations and management insight, in one portal.

Advanced dashboard for managers

Live KPIs on volumes, completion, retries and errors, over any period.

Incoming and outgoing

Every document with its status, recipient response and flow, with search and filters.

Workflow configurations

Peppol, ZUGFeRD, Factor-X, XRechnung and approval flows, set per company.

Multi-company

Switch between legal entities and countries in one account.

How it works

- Microsoft Dynamics
- Oracle / NetSuite
- Sage / IFS
- Odoo
- Accounting software

DOCNAUT PORTAL

one connection

Receive
From ERP or accounting

Transform
Into the required format

Validate
Country and business rules

Route
Over the right channel

Monitor
Status and audit trail

- Peppol network
- EDI partners
- Email (PDF, hybrid)
- National platforms
- Tax authorities

Beyond e-invoicing

The same platform, connection and portal handle the other digital compliance obligations companies face across countries.

E-delivery
E-waybill, e-transport and e-dispatch notes

SAF-T
Standard audit files for tax authorities

E-ledger
Electronic books and ledger submissions

E-VAT and e-reporting
Real-time and periodic VAT reporting

E-archive
Secure storage with full traceability

E-signature and e-seal
Built in where a country requires it

Certified, secure and connected to every network that matters.

Eaglessoft operates its own certified Peppol Access Point and SMP. We register your Peppol ID and handle sending and receiving end to end.

Certified information security management, applied to every document that passes through the platform.

Certified privacy information management, a level many e-invoicing providers do not hold.

Country formats and national platforms

One connection from your ERP or accounting system to all of them

“

The Peppol integration was fast, smooth and required no additional development from our side. EAGLESSOFT also helped us identify VAT and invoice errors before documents reached our customers.”

Tülay Yıldırım

Finance Manager, Akar Group

Getting started

- 1 Free system analysis**
We review your ERP or accounting system, volumes and countries.
- 2 Connect and test**
We connect, map your data and test with real documents.
- 3 Go live and grow**
Add countries and obligations as mandates arrive.
