

Every e-invoice. Every ERP. Every country.

Docnaut Portal is a global e-compliance platform built around e-invoicing. It connects your ERP or accounting system to Peppol, EDI, email and national platforms, keeps every invoice compliant with the rules of its destination country, and covers e-delivery, SAF-T and e-reporting through the same connection.

Peppol Access Point

Official, certified AP and SMP

ISO 27001 · ISO 27701

Certified security and privacy

Any ERP or accounting system

Dynamics, Sage, Odoo and more

Works with every ERP and accounting system

Microsoft Dynamics 365, Oracle, NetSuite, Sage, IFS, Odoo and accounting software of every size. Connect by API, SFTP, database connector or portal upload.

Compliant in every country

Each invoice is validated against the rules of its destination: EN 16931, Peppol BIS, national formats, clearance and reporting models. Rule updates are included.

Every transmission channel

Peppol, EDI (EDIFACT, ANSI X12), email with PDF or hybrid invoices, national platforms and tax authority portals, chosen per recipient.

Official Peppol Access Point

Eaglessoft runs its own certified Peppol Access Point and SMP. Your invoices go straight onto the network, with no third party in between.

High security by design

ISO/IEC 27001 and 27701 certified. Encrypted AS4 exchange, built-in e-signature and e-seal, full audit logs and e-archive.

Easy for finance teams

Send, receive and track every document from one clear screen, with real-time KPIs, Microsoft sign-in and a multilingual interface.

ONE PORTAL FOR EVERY CHANNEL

Peppol

EDI

Email

National platforms

Tax authority portals

Daily operations and management insight, in one portal.

Advanced dashboard for managers

Live KPIs on volumes, completion, retries and errors, over any period.

Incoming and outgoing

Every document with its status, recipient response and flow.

Workflow configurations

Peppol, ZUGFeRD, Factur-X and approval flows per company.

Multi-company

Switch between legal entities and countries in one account.

Beyond e-invoicing

The same platform, connection and portal handle the other digital compliance obligations companies face across countries.

E-delivery

E-waybill, e-transport and e-dispatch notes

SAF-T

Standard audit files for tax authorities

E-ledger

Electronic books and ledger submissions

E-VAT and e-reporting

Real-time and periodic VAT reporting

E-archive

Secure storage with full traceability

E-signature and e-seal

Built in where a country requires it
